Skewness and Kurtosis

Skewness	0	0	0.254921	0.244917	0	0	3.56975
Kurtosis	0	0	0.311195	0.0521433	0	0	18.5443

Skewness values are normal skewness(normal symmetry -mode=median=mean) for ssc_p,etest_p,mba_p and positive skewness for hsc_p,degree_p,salary(mode>median>mean).

Kurtosis rely on less than three for all fields except salary, so that comes under **platykurtic** whereas salary field relies on greater than three, so it comes to **loptokurtic** category.
